Daniel Maina Waweru

Solution Builder · Systems Architect · Full-Stack & Mobile Engineer

Nakuru, Kenya · Remote · danielmainawaweru@gmail.com · linkedin.com/in/danielmaina
Portfolio: danielmainawaweru.netlify.app · github.com/danmainah

// PROFILE

Solution builder and systems architect with **6+ years** turning ideas into production platforms that businesses, clinicians, students and corporate teams use every day. I design systems end to end, from **modular monoliths** that reach market fast to **microservices** that scale, and lead delivery across every layer: Node.js and PHP backends, React and Next.js frontends, React Native apps, M-Pesa and Stripe payments, and grounded AI. Founder of **NdunyuVendor** (100+ active vendors). The platforms I built at Clinifix, WeMove and Kenoobi are live and in maintenance, so I'm **available for a new role**.

6+ years building production systems	**100+** vendors on NdunyuVendor	**1,500+** companies on the WeMove platform	**40%** faster API responses	**200+** developers mentored at Microverse

// CORE EXPERTISE

Architecture	System design, microservices, modular monoliths, multi-tenant SaaS, AES-256, RBAC, HIPAA-aware
Backend	Node.js, Express.js, PHP (Laravel, pure PHP), Ruby on Rails, REST API design
Frontend	React, Next.js, TypeScript, JavaScript (ES6+), Vue.js, Nuxt, Redux, Tailwind CSS
Mobile	React Native, Expo, App Store and Google Play releases
AI & LLM	RAG pipelines (pgvector), OpenAI, Anthropic Claude and Google Gemini APIs, prompt engineering
Data	PostgreSQL, MySQL, MongoDB, SQLite, Prisma, Redis, query optimisation
Payments	M-Pesa (Daraja API), Stripe, LemonSqueezy, banking APIs, Africa's Talking SMS
Cloud & DevOps	AWS (S3), Vercel, Cloudflare, Netlify, Render, Docker, Git & GitHub, CI/CD, Jest
Leadership	Technical leadership, code review, mentoring, Agile / Scrum

// EXPERIENCE

Lead Software Developer · Clinifix — Maintaining

Remote · Jan 2025 – Present

Healthcare technology platform connecting verified professionals with facilities across Kenya.

- Led end-to-end engineering: **system architecture**, API design, integrations and engineering standards.
- Designed a **microservices architecture** on Node.js and PHP for secure healthcare data processing.
- Built PHP services and high-throughput, low-latency REST APIs for core logic and healthcare integrations.
- Integrated **M-Pesa Daraja and banking APIs**, enabling secure digital payments and new revenue streams.
- Introduced **AES-256 encryption** and role-based access control to protect sensitive patient data.
- Cut **time-to-feature by 30%** with reusable React and React Native component libraries.
- Established code review, CI/CD and development standards, raising code quality and deploy frequency.
- Now maintaining the platform I built: support, fixes and incremental improvements.

Software Developer · Reaction Wellness Ltd (WeMove) — Maintaining

Remote · Dec 2025 – Present

Employee-wellness platform that gamifies walking and team step challenges for corporate clients.

- Built and launched the cross-platform **React Native app** on the App Store and Google Play, earning **4.5+ star ratings** with zero critical bugs in the first 30 days.
- Developed two production web apps in React and Next.js supporting subscription-based corporate accounts.
- Implemented **Stripe** recurring subscriptions and in-app payments, enabling monetisation from launch.
- Designed scalable Node.js APIs and optimised PostgreSQL for reliability under peak load.
- Now maintaining the apps in production: bug fixes, performance work and iterative feature updates.

// EXPERIENCE (CONTINUED)

Full-Stack Developer · Lillup — Remote · Mar 2024 – Oct 2024

- Led core platform features, including leader dashboards, career tracking and an **AI recommendation engine** on the OpenAI API delivering personalised career insights.
- Partnered with the CTO on system architecture and the data pipelines feeding LLM features; built and documented the backend REST APIs.

Full-Stack Developer · Kenoobi Group Maintaining — Remote · 2020 – Present

- Built production applications for multiple clients with React, Node.js, Express, MongoDB, PHP/Laravel and SQL.
- Architected RESTful APIs and backend **microservices handling thousands of concurrent requests**.
- Introduced CI/CD pipelines and automated Jest test suites, **improving API response times by 40%** and reducing deployment errors.
- Now maintaining the client systems I delivered.

Technical Support Engineer · Microverse — Remote · 2022 – 2024

- Mentored a global cohort of **200+ developers** through structured code reviews, debugging sessions and architectural coaching.
- Guided JavaScript, React and Node.js projects, improving student project pass rates.

Junior Software Developer · Revobet — Remote · 2022 – 2023

- Delivered **20+ platform features** with Vue.js, Node.js and Express.js in agile delivery cycles.
- Resolved **18+ critical database bottlenecks** and added automated backend tests, improving system reliability.

// PRODUCTS & VENTURES

Founder & Lead Developer · NdunyuVendor — ndunyuvendor.com

Multi-tenant POS, inventory and eCommerce SaaS for 30+ business types, designed, built and operated from the ground up.

- Architected the platform on **Next.js (TypeScript), PostgreSQL and Vercel**, with fast, SEO-optimised server-rendered storefronts.
- Integrated **Stripe and M-Pesa (Daraja)** for local and international checkout, AWS S3 for media, and Cloudflare for DNS, DDoS protection and SSL.
- Run GitHub-based CI/CD with zero-downtime Vercel releases; **scaled to 100+ active vendors within 6 months** of launch.

Founder & Developer · ReviseMint — revisemint.com

Exam-prep SaaS helping nurses pass OET, IELTS and NCLEX, with every answer explained.

- Built an **AI question pipeline grounded in course notes** (RAG on Postgres + pgvector with Gemini) with human review before publishing, on Next.js with LemonSqueezy subscriptions.

Creator · PaySense — paysense-seven.vercel.app

- AI shop assistant that answers from a store's own documents and takes **M-Pesa (STK push) or Stripe payments inside the chat**, with prices always verified server-side.

// CONSULTING

Consultant · KIFFWA Impact Dashboard — End-to-end delivery

- Designed, architected and delivered an **impact dashboard for Kenya's water sector**, tracking water sold, electricity supplied and CO_2 reduction over time.

Consultant · Credit Bank & NDSI — Build contributor

- Contributed to the build of Credit Bank's gamified Diaspora Champions campaign microsite and the Nairobi Declaration on Sustainable Insurance website.

// EDUCATION

Diploma, Information Technology · Jomo Kenyatta University of Agriculture & Technology (JKUAT) — Kenya

Full-Stack Web Development · Microverse — Remote
